# Clonix AC Ulink & Blue-Entry

## Home Automation Solutions

### The remote control for garage operators? A smartphone.

Technology abreast of the times and attentive to daily needs: thanks to the use of U-link technology the garage door can now be opened with just your smartphone.

Practicality and safety combined in a single system. With Blue Entry simply touch the screen of your smartphone or just keep the application in automatic mode to open the garage door. A simple solution making a remote control no longer necessary. At the same time Blue Entry ensures maximum safety, allowing access only to smartphones configured in B-Eba Android, the device that receives the Bluetooth signal. The Clonix AC 2 E Ulink accessory allows Ulink technology to be used for Bft garage door operators.
