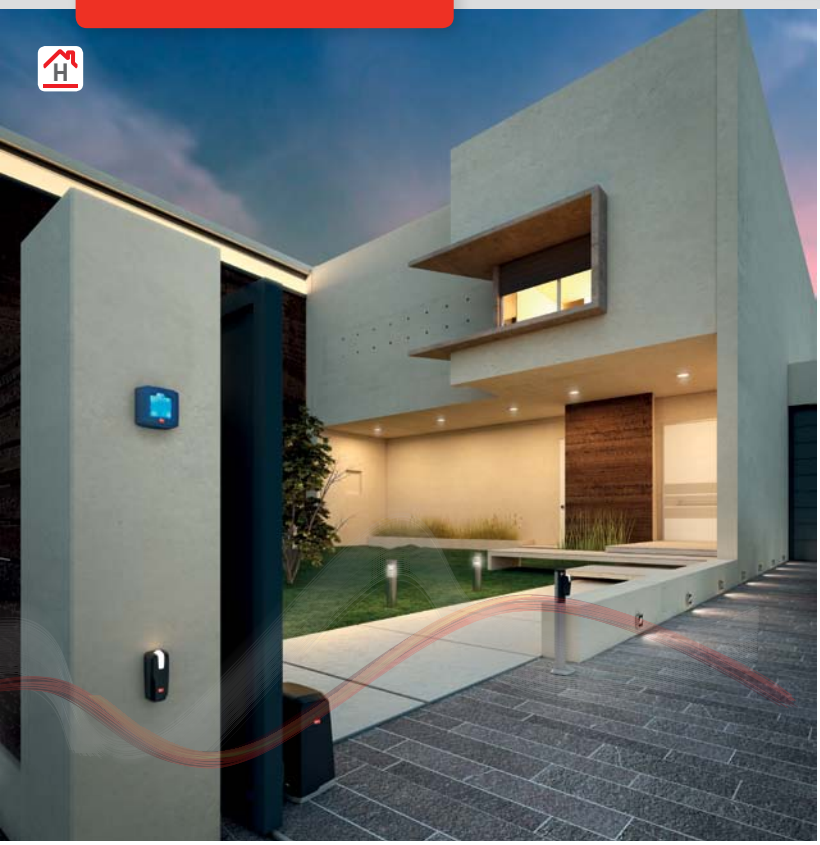
BLUE ENTRY FOR IOS



U-Link

Blue Entry for iOS operating system
Range of applications for the management of Bft automation equipped with U-link technology, simply using your smartphone with iOS operating system.

B EBA IOS

Code	Name	Description
P111748 00002	B EBA IOS LE 4	BLUE-TOOTH Low Energy expansion card for Blue Entry system. Manages up to 4 smartphones with iOS operating system. Compatible with iOS 7 operating system or later.
P111748 00001	B EBA IOS LE 8	BLUE-TOOTH Low Energy expansion card for Blue Entry system. Manages up to 8 smartphones with iOS operating system. Compatible with iOS 7 operating system or later.
P111748	B EBA IOS LE 16	BLUE-TOOTH Low Energy expansion card for Blue Entry system. Manages up to 16 smartphones with iOS operating system. Compatible with iOS 7 operating system or later.

BLUE ENTRY FOR IOS

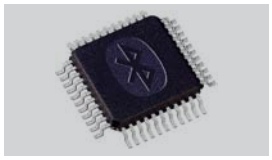
ADVANTAGES

Open the gate without remote control: An innovative application for access automation management with just a touch on your smartphone with iOS operating system.

PLUSES

Flexible use: Operation in manual mode, with confirmation by the user before opening, and in automatic "hands-free" mode for opening the gate simply by approaching it.

A single device for all home accesses: Maximum flexibility in use and modularity over time: Blue Entry allows an extremely high number of different accesses to be controlled and nominated, assigning the most convenient manual or automatic opening mode for each.



Bluetooth Low energy: A new microchip that exploits BlueTooth Low Energy technology: to minimise battery consumption of the device and ensure full operation over time.

Access safety: Maximum control and access protection, thanks to the data encryption guaranteed by the Bluetooth standard and AES encryption.

What is U-Link?

The innovative technology that gives you new power

An exclusive Bft innovation: U-Link (Universal Link) is an exclusive Bft platform that allows the creation of technological ecosystems. In Home Access Automation it allows communication with all home access automation devices, by any brand. So you save time and can control everything with ease, without any worries.

It's intuitive
Easy to install and use

It's scalable
It allows an unlimited number of devices to be added

It's flexible
It allows the creation of groups of interconnected products

It's practical
It works with or without a web connection

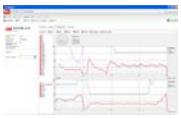
It's functional
Parameters can be controlled remotely via dedicated applications

BLUE ENTRY FOR IOS

All in one scheme: discover this amazing technology

A unique platform allowing the creation of technological ecosystems offering a wide range of solutions for different sectors.

Thanks to the **B-Eba** cards and the **Clonix U-Link receiver, this proprietary platform featured by Bft products adapts to any protocol and access automation product** (even non-Bft and old generation), and **is used in various sectors**. Each device thus becomes smart and can be interconnected with other systems, thanks to a language that becomes universal.



U-Base 2

Software to install and easily and comfortably carry out maintenance and identify any malfunction of U-link compatible operators.

U-SDK

U-Sdk is the innovative application that can make Bft automation systems compatible and easily integrated with a BMS network for the supervision of buildings.

Magistro

An innovative and easy to install system for easily managing all home automation systems.

U-Control

U-Control is the application that helps the quick and easy integration of BFT automation systems in large building management systems.

Blue-Entry

Technology abreast of the times and attentive to daily needs: thanks to the use of U-link the house gate can now be opened with just your smartphone.

Clonix U-Link

Allows the connection of old-generation products or non-Bft products to U-Link systems.

Old-generation Bft operators or a product belonging to other brands: can they be connected to U-link? Yes, thanks to the Clonix receivers. Accessories that know no limits.

B-eba

A direct line with your operators.

B-eba expansion cards allow the connection of external devices, such as PCs, smartphones and tablets, to a Bft operator or Clonix receiver, or the connection of several Bft products in a U-Link network. These accessories integrate with U-Link technology and Bluetooth, Z-Wave, TCP/IP protocols, as well as the RS485 serial connection.
A device that fully translates what Bft means for interconnectivity.
